

ANDREI SCRIPCARU

SENIOR FULL-STACK SOFTWARE ENGINEER

scripness.com | mail@scripness.com | +373-78-181-261

SUMMARY

Senior full-stack software engineer with more than a decade of experience across system design, backend, frontend, infrastructure, and product delivery. I use coding agents to produce the implementation. I turn goals into clear issues and correct plans, define acceptance criteria and a definition of done, and use deterministic feedback loops, layered tests, and automated and manual QA to prove the result works.

SKILLS

- System Design & Architecture
- Technical Planning & Decision-Making
- Requirements & Product Analysis
- Full-Stack Product Delivery
- Testing & QA Strategy
- Infrastructure & Operations

Practices	Microservices, DDD, clear issues and plans, acceptance criteria, definition of done, coding agents, deterministic feedback loops, automated and manual QA

EXPERIENCE

Cryptoli

Cryptocurrency review and community platform

- Applied my full-stack experience across the public website, backend, admin tools, community features, moderation, search, notifications, analytics, and real-time features
- Gained practical experience using coding agents through the full development process: clear issues and plans, acceptance criteria, deterministic feedback loops, layered testing, automated and manual QA, and running the product

TypeScript, NestJS, Next.js/React, PostgreSQL, Redis, Playwright

FinancialDocs

Full-Stack Engineer | Contract | Remote

- Maintained three legacy paystub platforms (thepaystubs.com, paystubs.net, paystubcreator.com) serving hundreds of users, evolving a shared codebase of 2,000+ service classes without breaking production
- Architected a legal document platform (legaldocs.com) — designed the CMS data model with 14 collections, built the document generation pipeline, and integrated dual payment providers
- Designed a webhook-based caching system with CDN integration to handle content updates across interconnected documents

TypeScript, PHP, React/Next.js, NestJS, PayloadCMS, MongoDB, PostgreSQL

NIXAP

Full-Stack Engineer | Contract | Hybrid

- Built custom web applications and internal tools for client projects
- Engineered a scalable multi-tenant VoIP system integrating PBX/SIP protocols with a desktop application for call management

TypeScript, PHP/Symfony/Laravel, Node.js, Vue.js/Nuxt.js, Electron, VoIP/SIP, RabbitMQ, Elasticsearch, WebSocket

Rio

Full-Stack Engineer | Contract | Remote

- Developed backend services (Kotlin, Node.js) and frontend features for a live-streaming platform

Kotlin, NestJS, Node.js, Vue/Nuxt, TypeScript, PostgreSQL

Crawless

Full-Stack Developer | Contract | Remote

- Built backend systems and internal CRM for an Electron-based browser automation IDE

TypeScript, Vue.js, Electron, PostgreSQL, MongoDB, REST, Jest

Dispatch42

Full-Stack Developer | Full-Time | In-Office

- Architected a real-time logistics CRM with microservices backend and mobile app
- Built serverless notifications system and integrated proprietary hardware data feeds

TypeScript, Kotlin, React, GraphQL, Node.js, AWS (Lambda, SQS, DynamoDB, CDK), Jest

Deditech Com

Full-Stack Developer | Contract | Remote

- Led development of a B2B CRM and a home rental platform from scratch

PHP/Laravel, Vue/Nuxt, TypeScript, MySQL

eToro

Back-End Developer | Contract | Remote

- Led backend API development for a mobile application serving job seekers and recruiters

PHP/Laravel, MySQL, REST, Pest

MKM

Full-Stack Developer | Contract | Remote

- Developed a UK e-commerce platform integrating headless CRM and payment APIs

PHP/Laravel, Vue/Nuxt, TypeScript, MySQL, Cypress

GoodLeap

Back-End Developer | Contract | Remote

- Built and maintained serverless microservices for a large-scale solar financing platform, integrating DocuSign and payment workflows

Node.js, TypeScript, AWS (Lambda, SQS, S3), REST, Jest

RentInsider

Front-End Developer | Contract | Remote

- Led frontend development from scratch for a Romanian/European rental platform, integrating with a Python backend

TypeScript, React/Next.js, ChakraUI, REST, Cypress

Virail

Full-Stack Developer | Contract | Remote

- Developed backend and frontend features for a high-traffic travel search engine, integrating Elasticsearch for performance

PHP/Phalcon, Vue, Elasticsearch, REST, Cypress

Deutsche Fintech Solutions

Front-End Developer | Contract | Remote

- Led frontend development and transition to micro-frontend architecture for B2C/B2B financial apps

TypeScript, React/Next.js, Svelte, GraphQL, Luigi/Micro-frontends, Cypress

Travod

Full-Stack Developer | Full-Time | In-Office

- Developed backend and frontend for Traduno, an in-house translation services CRM
- Led development of a GraphQL API layer over the existing Ruby backend

Ruby/Rails, Vue/Nuxt, GraphQL, MySQL, RSpec

Independent Freelancing

Full-Stack Developer | Freelance

- Delivered 80+ projects across CRM, SaaS, and e-commerce — handling client requirements, architecture, implementation, and ongoing maintenance end-to-end
- Worked across web, desktop, and mobile stacks with direct client interaction throughout

PHP, JavaScript/TypeScript, Python, Vue.js, React, Node.js, MySQL, PostgreSQL, MongoDB, DynamoDB, Flutter, Delphi

TESTIMONIAL

Andrei is a one of a kind senior AI-powered developer that would be an immense added value on any team. Not only is he a master of the latest Agentic-AI workflows, but he ensures the quality of work that comes out is impeccable. He uses very sophisticated AI workflows for producing any full-stack feature in very fast speed with top-notch quality. For anyone looking to hire Andrei on any project, you cannot go wrong, hire immediately; he will make your project much better, and very fast. The best developer I've come across in the past 20 years or so. This is what a top-notch developer should look like in 2026.
